

Our Shared Home

December 26-30, 2022

With a history that dates back several billions of years, Earth supports such an expansive range of diverse lifeforms that we're still regularly discovering new species that were previously unknown to humankind! When living in such close proximity to so many other creatures, one might pause to evaluate how well we're all sharing space with one another. After all, our fate as humans is closely tied to the health of the other animals we roam the planet with. Join us as we take a closer look at how we can band together to nurture a more hospitable home for all!
